**Because maintaining and orchestrating build and deployment technologies and tooling is hard...**
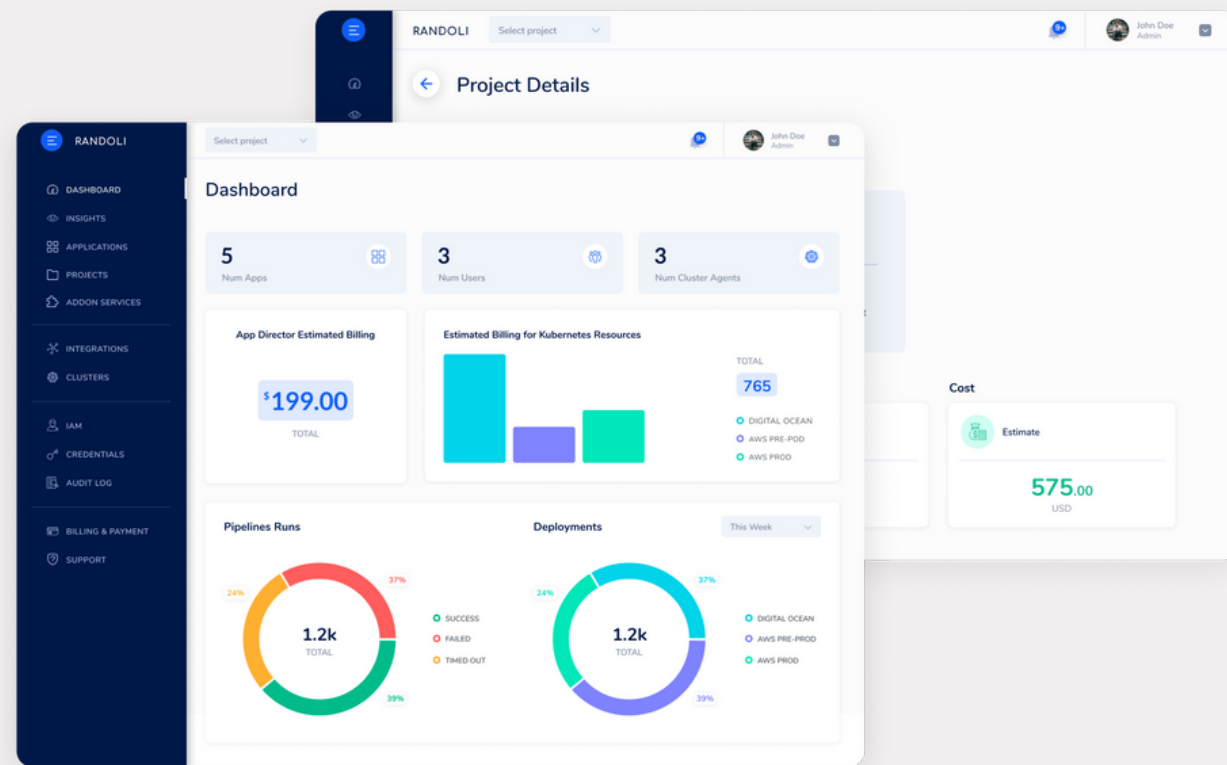

RANDOLI

# Randoli App Director

Vendor neutral developer self-service DevOps platform
*Supercharge* your developer productivity

## Through App Director Teams Receive

- **A Single Pane-of-Glass** to manage multiple Kubernetes apps and clusters
- **Developer Self-Service** with built-in guardrails that allow you to scale developer productivity
- **A Kubernetes expert in a box** bringing industry standards and insights to narrow the cloud skill gap
- **Templates and Controls** to automate repetitive DevOps tasks while adhering to your organizations best practices

### DevOps tasks are automated and the focus can shift to high impact tasks

- Create and share application and environment templates
- Control CI & CD settings to maintain organizational standards
- Gain insight into project and cluster costs for the entire organization
- IAM Audit log and security settings

### Developers focus on building applications with speed, best practices and security

- Template-driven application deployment to Kubernetes clusters in minutes
- Containerize applications through cloud-native-buildpacks
- View build and deployment feedback
- Gain actionable insights into application behaviour
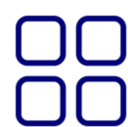

## Key Features

*Expected Q4 2022 | **Expected Q1 2023
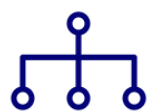

- Application Onboarding Wizard
- App & Env Template Catalogue
- Cloud-Native CI (via Tekton)
- Cloud-Native Build Packs
- GitOps Ready CD (GitLab/Github/Bitbucket)*
- Blue / Green & Canary Deployments*
- Quick Build & Deploy Feedback Loop
- Single Pane-of-Glass Across Multiple Clusters
- Security, IAM, Audit, TLS
- Project Cost Models**

## We are partnered and available on multiple cloud vendors, including:

aws marketplace
